PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in Business Intelligence (BI) and Financial Sentiment Analysis. Using BI tools (Power BI, Tableau) to visualize data and provide actionable insights, as well as using that techniques for sentiment analysis to predict market trends. Adept at transforming complex data into clear, impactful reports that support business decision-making.

EDUCATION

Bachelor of Technology (Computer Science Engineering) *Aug 2021 - May 2024*
Parul Institute of Technology

Diploma (Computer Engineering) *July 2018 – June 2021*
Gujarat Technological University

EXPERIENCE

Business Analytics Intern
YBI Foundation *Jun 2024- Aug 2024*

- Utilized BI tools (e.g., Power BI, Tableau, or Excel) to gather, clean, and analyze large datasets, providing actionable insights that supported decision-making and business strategies.
- Designed and implemented interactive dashboards and reports, visualizing key performance indicators (KPIs) and trends to facilitate real-time monitoring and enhance business performance.

Data Scientist Intern
YBI Foundation *Dec 2023 - April 2024*

- Worked on Financial Market Sentiment Analysis
- The objective of the project is to develop a predictive model capable of analyzing market sentiment based on textual data extracted from various sources such as social media, financial news, and forums using Python, Machine Learning, Random Forest classification.

PROJECTS

Financial Sentiment Analysis *Dec 2023 - April 2024*

- Led the extraction and preprocessing of financial news, social media posts, and analyst reports using NLP techniques to build a robust dataset for sentiment analysis, focusing on market trends and investor sentiment.
- Generated actionable insights by correlating sentiment trends with stock price movements, presenting findings through visualizations and reports that aided stakeholders in making informed investment decisions.

Decentralized Finance *Aug 2024 – Dec 2024*

- Developed and deployed smart contracts on Ethereum or other blockchain platforms to facilitate decentralized financial transactions, ensuring security, transparency, and automation of financial processes like lending, borrowing, or staking.
- Utilized data analytics tools to track and visualize key performance indicators (KPIs) for DeFi platforms, such as liquidity, transaction volumes, and returns on investments

SKILLS

- Python, SQL, Power BI, Excel, Business Analysis, Data Analysis, HTML, CSS
- Technical Analysis, Fundamental Analysis, Equity and Derivatives Analyst

Certificates

- NISM-SERIES-VIII: Equity Derivatives
