Key Projects

1. **Project Title: Marketplace**

Description: An e-commerce platform which sells any product online. The store can add products with various variations, and the customer can choose which variant of a product they want. The platform also provides delivery companies to register with the platform and manage their delivery executives to provide customers with delivery when they want. The customer can use the mobile application to browse products on the platform, purchase what they like and get it delivered to their doorstep when they choose. The customer can pay online using their credit card.

Technology Stack:

Back-end: ASP.NET MVC

Database on MS SQL Server 2019

Role/Designation: Worked as ASP.NET MVC Sr Back-end developer. Also created Web API for Mobile Team.

2. **Project Title: Furni**

Description: An instance of Marketplace for an interior design and décor online store platform. Furni partners up with various stores and delivery partners to provide exclusive and premium interior décor to Customers' doorstep when they want. They can also enjoy the immersive experience of placing products available on Furni right in their home with an Augmented Reality view of available products.

Technology Stack:

Back-end: ASP.NET Core Web application built using MVC Core Web API built on ASP.NET Core 3.1 framework

Database on MS SQL Server 2019

Role/Designation: Worked as ASP.NET MVC Sr Back-end developer. Also created Web API for Mobile Team.
